PRESS RELEASE

FOR IMMEDIATE RELEASE

October 26, 2016

Beginning Wednesday, October 26th, Washington County will close the bridge on 315th Street west of Kiwi Avenue to thru traffic, for a repair project on the bridge abutments by local contractor, Iowa Bridge and Culvert, L.C. The project consists of driving additional piling and installing supplemental bents just inside the existing abutment. This repair and patching work is intended to remove the weight restrictions on the bridge. Additional rip rap will be placed around both abutments to help protect them from any scouring. The work is expected to be completed in two to three weeks, weather permitting.

Any questions about the project should be directed to the Washington County Engineer's Office, (319) 653-7731.
